

Section 1: Quick Start Instructions (Before Activation)

Follow these steps to run a test game immediately using the trial mode:

1. **Build the Card Database** (*First-time run only or after activation*)
Click the **[Make Card Sets]** button (green) at the top left of the screen. This generates the underlying card data necessary for the game to function.

Click the **[Prepare Live Game]** button (yellow) at the top.
 3. **Select Your Range**
 - Enter **1** for the *Game Number*.
 - Set the *Card Range* from **1** to **2** (the maximum allowed in trial mode).
 - Click **[PROCEED]**.
 4. **Launch the Game**
Once the calling board appears, press the **[Spacebar]** or click the **[GET BALL]** button (blue) to begin drawing and calling numbers.
